

2001 - SilverDollar

FDA Approved 2000 Series - Opaque Metalized Barrier Material

Introduction

This opaque metalized film is typically used in the food, medical, and general industrial applications. The metallization of the PET reduces OTR and MVTR to extend shelf life and/or protect the product from environmental factors. The LDPE sealant layer enables this laminated structure to be heat sealable.

Kosher and heat sealable, BPA and Phthalate free.
